Portfolio

Full-Stack Developer (Project-Based Experience)

TinyThought – Sentiment-Aware Journaling App

🔗 **GitHub**: github.com/AferePreciousOnome/tinyThought

Full-stack journaling platform promoting emotional well-being through sentiment analysis and mood tracking.

- Built with React, Node.js, and PostgreSQL, featuring JWT-based auth and protected routes
- Implements real-time sentiment analysis of journal entries using the sentiment npm package
- Includes interactive mood tracking via Recharts and intuitive UI with CSS Modules
- Enables secure login, password reset, and personalized journal history per user

Smart-CV Path-folio (Team Project)

🔗 **GitHub**: github.com/SyedArslanHaider/smart-cv-builder

- Contributed to a smart CV generator with AI integration on the backend.
- Built reusable React components, added local storage functionality, and enhanced front-end UX.
- Led conflict resolution and team coordination to maintain project momentum.
- Wrote the full presentation and technical documentation for the project.

Personal Portfolio Website

🔗 **GitHub**: github.com/AferePreciousOnome/MyPortfolio

- Built a fully responsive portfolio using React, CSS Modules, and React Spring
- Showcases personal projects, skills, and Migracode Barcelona bootcamp experience
- Designed with reusable components and modern UI/UX principles
- Added features like smooth scroll, animated sidebar, and copy-to-clipboard functionality

Educational Background

Full-Stack Web Development Bootcamp

MigraCode Barcelona — Graduated: 2025

- Completed an intensive one-year bootcamp focused on full-stack web development
- Gained hands-on experience with technologies like React, JavaScript, Node.js, Express, PostgreSQL, Git, and more
- Worked on real-world projects in collaborative team environments
- Developed both front-end and back-end applications with a focus on clean code and responsive design
