

Precious Onome Afere - Fullstack Developer

■ Barcelona | ■ preciousafere@gmail.com | ■ 632 587 728

■ [Portfolio](#) | [Github](#) | [LinkedIn](#)

Professional Summary

Full-stack web developer skilled in React, Node.js, and PostgreSQL, with experience building and deploying applications that achieve measurable results such as <1s API response times, 90%+ NLP accuracy, and 95% user-rated relevance. Delivered 3+ full-stack projects using REST APIs, serverless functions, and authentication systems. Seeking a junior developer internship to apply problem-solving and Agile collaboration skills in developing scalable, user-focused applications.

Technical Skills

- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3
- Backend: Node.js, Express.js, REST APIs, Serverless Functions
- Databases: PostgreSQL, MySQL
- Tools & Platforms: Git, GitHub, CI/CD, Netlify, Vercel
- Practices: Agile/Scrum, Test-Driven Development (TDD), JWT Authentication

Experience & Projects

Smart CV Builder – AI-Powered Resume Generator

- Collaborated with fellow bootcamp students to develop an AI-driven CV builder as part of team project work.
- Integrated Google Gemini API, improving CV relevance with 95% positive feedback from testers.
- Optimized backend with Netlify serverless functions, reducing API response times to <1s.
- Applied modular React architecture, which streamlined feature development and improved maintainability.
-

Egg Timer App – Cooking Timer Application

- Developed a responsive timer app with real-time alerts for multiple egg types.
- Conducted testing with 15+ users, with 90% reporting improved accuracy.
- Enhanced user experience by implementing an intuitive UI and cross-device notifications.
-

TinyThought – Sentiment-Aware Journaling Platform

- Built a full-stack journaling application with sentiment analysis, enabling users to track and visualize mood trends.
- Achieved over 90% classification accuracy during testing with NLP libraries.
- Implemented JWT authentication to ensure secure access and data protection.
- Designed and tested backend APIs, authentication, and frontend components, demonstrating full-stack development skills.
- Chose not to deploy publicly, focusing on building a secure, fully functional prototype.

Education

MigraCode Barcelona – Full-Stack Web Development Bootcamp (Jul 2024 – Jun 2025)

freeCodeCamp – JavaScript Algorithms & Data Structures Certification (Aug 2025)
